Q1 | Top 5 Merchants by GMV per Quarter

Q3 2024 (Jul – Sep)

#1	Delta Luxe 183 Jewelry & Watches	5.09M EGP
#2	Al Explore 12 Travel & Tourism	4.90M EGP
#3	Gold Jewels 119 Jewelry & Watches	4.19M EGP
#4	Top Travel 242 Travel & Tourism	3.75M EGP
#5	City Gold 402 Jewelry & Watches	3.60M EGP

Q4 2024 (Oct – Dec)

#1	City Gold 402 Jewelry & Watches	5.29M EGP
#2	Blue Gold 906 Jewelry & Watches	5.23M EGP
#3	Delta Luxe 183 Jewelry & Watches	5.15M EGP
#4	Gold Jewels 119 Jewelry & Watches	4.75M EGP
#5	Smart Gems 797 Jewelry & Watches	4.61M EGP

💡 Jewelry & Watches dominates Q4 — all 5 spots — driven by December holiday gifting season.

Q2 | City Contribution to Total GMV

July 2024

City	TXN	GMV EGP	% Share
Cairo	13,890	22,010,674	30.94%
Giza	8,243	11,095,326	15.59%
Alexandria	6,014	10,140,743	14.25%
Hurghada	3,153	5,912,898	8.31%
Sharm El-Sheikh	2,867	4,666,108	6.56%
Luxor	2,930	4,474,608	6.29%
Port Said	2,106	4,053,507	5.70%
Mansoura	2,974	4,010,878	5.64%
Tanta	1,712	2,870,669	4.03%
Ismailia	1,129	1,912,244	2.69%
Grand Total	45,018	71,147,656	100%

Insight 01

Between July and December, the total platform GMV grew significantly from **71.1M EGP** to **95.3M EGP** (an increase of over 24 million). The top 3 cities remained incredibly stable roughly **60-62%**.

Dec 2024

City	Count of	GMV EGP	% Share
Cairo	17,092	28,743,772	30.20%
Giza	11,597	15,562,802	16.30%
Alexandria	8,224	14,811,007	15.50%
Hurghada	3,927	8,277,889	8.70%
Sharm El-Sheikh	4,573	6,481,890	6.80%
Port Said	2,996	5,074,168	5.30%
Mansoura	3,824	5,054,104	5.30%
Luxor	3,335	4,827,611	5.10%
Tanta	2,312	3,727,520	3.90%
Ismailia	1,475	2,762,192	2.90%
Grand Total	59,355	95,322,955	100%

Insight 02

Luxor saw a drop in its overall rank, falling from 6th place in July to 8th place in December, with its share dropping from **6.29% to 5.1%**.

Cairo + Giza + Alexandria = ~60% of GMV in both months | Dec total is +34% above July driven by holiday season

Q2 | City Contribution to Total GMV

July 2024

Dec 2024

City	Jewelry & Watches	Travel & Tourism	Electronics	Automotive	Home & Living	Apparel	Food & Beverage	Grocery	Health & Pharmacy	Sports & Fitness	Grand Total

In July, Travel & Tourism was the **2nd highest category (generating 15.5M EGP)**. However, in December, Travel dropped to **3rd Category 13M EGP**, Jewelry & Watches surged by 80% from 16M EGP in July to a massive **28.8M EGP** in December. Similarly, **Electronics jumped from 13.4M EGP to 18.6M EGP**.

Q3 | Category Expansion Recommendation

Jewelry & Watches

108.5M EGP GMV | 0.44% Profit Margin | 6,566 EGP Avg Tx | 474,569 Profit (Highest)

#1 category by GMV. Highest average transaction value (6,566 EGP). December spike (28.9M) creates predictable high-ROI window.

Apparel

35.2M EGP GMV | 0.60% Profit Margin ← Highest | 776 EGP Avg Tx

Highest profit margin of all 10 categories. 45K+ transactions = 3rd highest volume. High frequency + high margin = ideal expansion.

Category	Total GMV	GMV % Share	No of Transaction	AVG Transaction Value	Profit	Prof Margin	AVG Profit Per Transaction
Jewelry & Watches	108,531,049	24.10%	16,528	6,566	474,569	0.44%	28.71
Electronics	89,028,994	19.80%	33,832	2,632	194,017	0.22%	5.73
Travel & Tourism	70,756,582	15.70%	15,479	4,571	177,682	0.25%	11.48

Why These 10 Merchants?

Building a data-driven scoring model By Python and Excel

01	Filter Q4 Only	02	4-Metric Scoring	03	Tier Assignment
	Oct / Nov / Dec 2024 Completed status only 158,246 transactions 967 merchants		GMV Percentile ×40% Profit Percentile ×30% Margin Percentile ×20% Tx Count Percentile ×10%		Platinum ≥ p90 Gold ≥ p75 Silver ≥ p50 Bronze < p50

Why weighted? GMV & Profit are highly correlated ($r = 0.85$) — equal weights would double-count the same signal. Weighting by business importance avoids this bias.

Scoring Model | Correlation Matrix & Tier Distribution

Correlation Matrix — Q4 Merchants

	GMV	Tx Count	Profit	Margin
GMV	1.00	0.56	0.85	0.31
Tx Count	0.56	1.00	0.49	0.41
Profit	0.85	0.49	1.00	0.40
Margin	0.31	0.41	0.40	1.00

⚠ GMV & Profit: $r = 0.85 \rightarrow$ Nearly the same signal. Equal weights would double-count both.
Solution: Reduce Profit weight to 30% and raise GMV to 40%.

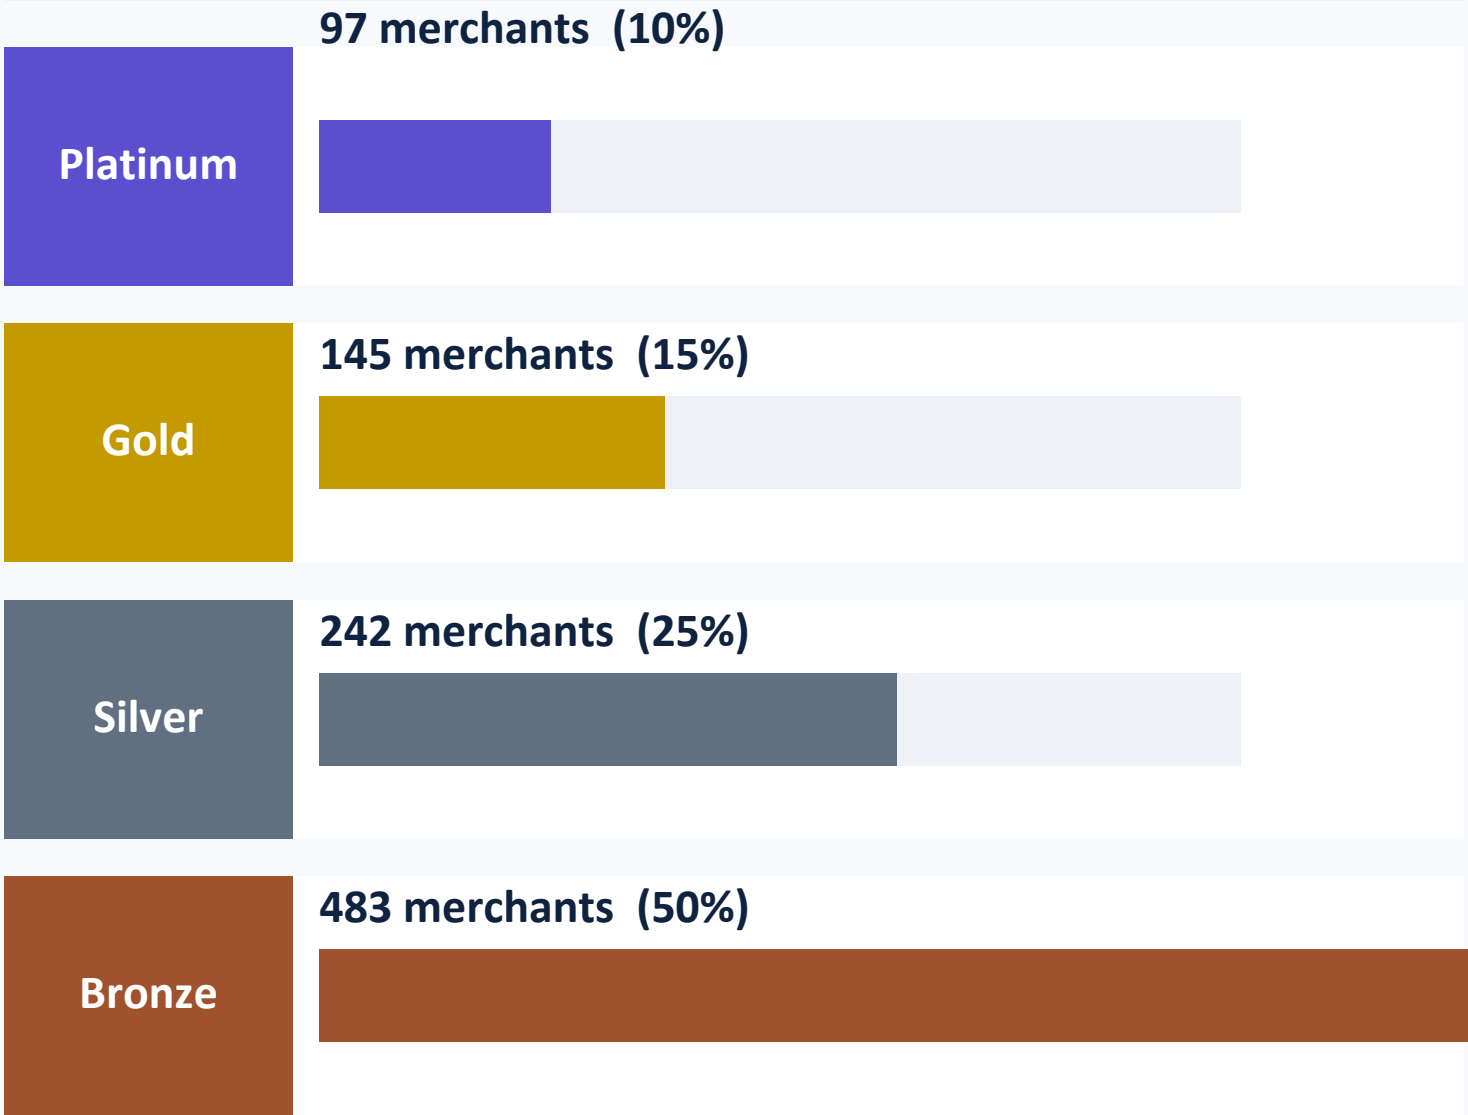

Quarter 4 Season - (White Friday - December Seasonal)

- 8 Platinum Merchants - Safe Growth
- 1 Gold Merchant - Test Promotions for Gold Tier
- 1 Silver Merchant - Test Promotions for Silver Tier

Tier Distribution (967 Merchants)

Thresholds (based on actual data distribution):

p90 = 0.8967 $\rightarrow$ Platinum | p75 = 0.7999 $\rightarrow$ Gold | p50 = 0.6383 $\rightarrow$ Silver

- Achieved 189% growth compared to November, while monitoring the top 10 products by GMV and the single most profitable item each month.
- December marked a record peak with 2.47M EGP in GMV, 387 transactions, and 19.5K in profit, capping an October-to-December surge that saw GMV grow by 176%, transactions by 151%, and profits triple.
- Q4 Seasonal Peak: December drove the highest performance with 1.67M EGP in GMV (+233% vs. Nov) and 12.6K EGP in profit across 359 transactions.
- Margin Stability: Maintained a consistent 0.73%–0.80% profit margin year-round, demonstrating highly efficient monetization despite volume fluctuations.
- Consistent growth from October culminated in a December peak, effectively doubling key metrics to reach 438K EGP in GMV, 539 transactions, and 3.8K EGP in profit.
- A highly stable 0.80%–0.87% profit margin demonstrates strong monetization efficiency, ensuring that any increases in transaction volume directly translate into higher profitability.
- Strong Q4 performance culminated in an exceptional December peak, hitting 2.88M EGP in GMV and 13.2K EGP in profit across 432 transactions to rank third highest in the category.
- Profit growth relies heavily on transaction scale due to stable 0.46%–0.52% margins, making December's high-demand season the most recommended period for promotional campaigns.

Q4 | Promotion & Budget Recommendation — Recommended 10 Merchants

#6	Pro Drive 555 Automotive Platinum GMV: 2.87M	OCT PROMO
#7	Top World 298 Electronics Platinum GMV: 2.33M	NOV PROMO
#8	Delta World 50 Electronics Platinum GMV: 1.94M	OCT PROMO
#99	Top Trips 447 Travel Gold GMV: 898K	DEC PROMO
#243	New Wear 111 Apparel Silver GMV: 200K	NOV PROMO

- Strong peak in October with 1.24M EGP GMV and 362 transactions, generating the highest profit (5.5K EGP) and ranking top 5 by profit, followed by a slight decline in Nov–Dec as GMV fell (877K → 758K) and profit decreased (4K → 3.3K EGP).
 - Margins remained stable (~0.44%–0.46%), indicating that profitability is mainly driven by transaction volume and GMV growth.
- Peak performance occurred in November with 1.12M EGP GMV and 442 transactions, generating the highest profit (5.35K EGP) and ranking 4th in the Electronics category, followed by a sharp decline in December where GMV dropped to 506K EGP and profit to 2.3K EGP, while margins remained stable (~0.45%), indicating profitability is mainly driven by transaction volume.
- Best performance occurred in October with 770K EGP GMV and 281 transactions, generating the highest profit (4.96K EGP) and ranking 6th in the category, followed by a slight decline in Nov–Dec as GMV fell (627K → 544K EGP) and profit decreased (3.96K → 3.81K EGP), despite margin improvement to 0.70%, indicating efficiency increased but scale decreased due to lower transaction volume.
- As a test case for the Gold tier, Top Trips 447 shows steady GMV growth across Q4, peaking in December (359K EGP GMV, +58% vs Nov) with higher transactions (75 vs 53), driving profit up to 1.64K EGP (+88%) while margins remained stable (0.38%–0.46%), indicating volume-driven performance and strong potential for promotional activation to generate incremental profit without margin deterioration.
- As a test case for the Silver tier. Peak performance occurred in November with 74.9K EGP GMV and 100 transactions, generating the highest profit (528 EGP) and margin (0.70%), followed by a decline in December (59K GMV, 77 transactions),

Q5 | Additional Data Insights

 POS vs. ONLINE Adoption by City

POS
Online

 4% Chargeback Rate & 8% Refund Rate

 Payment Method Profitability

Payment Method (Categories Behavior)

Q5 | Additional Data Insights

Analyzing "Refunded" and "Chargeback" Risk

% of Transactions			
Categories	Chargeback	Completed	Refunded
Apparel	3.93%	88.12%	7.95%
Automotive	4.05%	88.11%	7.84%
Electronics	3.99%	88.20%	7.81%
Food & Beverage	3.94%	88.09%	7.98%
Grocery	4.09%	87.88%	8.03%
Health & Pharma	3.90%	88.07%	8.03%
Home & Living	4.17%	87.71%	8.12%
Jewelry & Watches	3.95%	87.95%	8.10%
Sports & Fitness	3.85%	87.95%	8.20%
Travel & Tourism	3.92%	87.93%	8.15%
Rate	3.98%	88.02%	8.00%

! 4% Chargeback Rate & 8% Refund Rate

Home & Living (4.2%), Grocery (4.1%), and Automotive (4.1%) have the highest rates. Each chargeback reverses fee revenue while processing cost remains — a silent profit drain.

Sports & Fitness has highest customer dissatisfaction.

Refund Rate = 8.20% (highest)

Chargeback Rate = 3.85% (below avg)

Home & Living is the only category appearing in both high refund and high chargeback groups, indicating it is the most operationally risky category overall.
Refund Rate = 8.12% (high)
Chargeback Rate = 4.17% (highest in dataset)

Q5 | Additional Data Insights

POS vs. ONLINE Adoption by City

POS
Online

POS is the dominant payment channel across all cities in Egypt.
Overall POS share = 61.77%
Overall ONLINE share = 38.23%

The highest online payment adoption is observed in Port Said (41.34%), followed by Tanta (40.83) followed by tourism-heavy cities such as Hurghada (40.09%) and Luxor (39.73%), suggesting that both tourism activity and port/trade exposure contribute to higher digital payment usage.

- Port Said → 41.34% ONLINE (highest in dataset)
- Tanta → 40.83% ONLINE
- Hurghada → 40.09%
- Luxor → 39.73%
- Sharm El-Sheikh → 39.45%

POS vs. ONLINE Adoption by City		
% of transactions		
Cities	ONLINE	POS
Alexandria	39.16%	60.84%
Cairo	36.59%	63.41%
Giza	37.94%	62.06%
Hurghada	40.09%	59.91%
Ismailia	36.33%	63.67%
Luxor	39.73%	60.27%
Mansoura	37.23%	62.77%
Port Said	41.34%	58.66%
Sharm El-Sheikh	39.45%	60.55%
Tanta	40.83%	59.17%
Rate	38.23%	61.77%

Q5 | Additional Data Insights

Payment Method Profitability					
detailed_payment_method	GMV EGP	fees EGP	Profit	Profit Marg (per fees)	Prof Margin (per GMV)
Accept	270,537,345	4,857,970	1,219,737	25%	0.45%
Bank Installments	64,979,663	1,187,261	155,319	13%	0.24%
Consumer Finance	114,603,605	2,101,620	82,119	4%	0.07%
Grand Total	450,120,614	8,146,850	1,457,175	18%	0.32%

Payment Method Profitability

Accept (direct payments) is the most profitable payment method, generating the highest absolute profit and the strongest GMV-based margin compared to other methods.

Profit = 1.22M (highest)

GMV Margin = 0.45% (highest)

Fee Margin = 25% (highest)

Accept contributes ~60%+ of total GMV
and ~80%+ of total profit (1.22M out of 1.45M total)

Consumer Finance generates lower revenue efficiency for the company because it introduces revenue sharing with financing partners, delays cash flow through installment structures (e.g., up to 45 days settlement), and increases exposure to credit risk, all of which reduce the effective profit margin compared to direct payment methods.

Consumer Finance = 114M GMV (2nd highest) but lowest profit (82K)
Accept = highest GMV efficiency + highest profit

Q5 | Additional Data Insights

Payment Method (Categories Behavior)			
Count of transaction_id	detailed_payment_method		
category	Accept	Bank Installments	Consumer Finance
Apparel	80.05%	10.05%	9.89%
Automotive	50.57%	14.93%	34.49%
Electronics	55.38%	14.91%	29.72%
Food & Beverage	93.16%	4.94%	1.90%
Grocery	97.00%	2.03%	0.97%
Health & Pharma	85.82%	6.10%	8.08%

Travel & Tourism	55.20%	19.91%	24.89%
Grand Total	76.74%	9.54%	13.71%

Important One Action

Increase platform fees/commission on Consumer Finance transactions to improve profitability, while leveraging its high GMV contribution instead of reducing its usage.

Payment Method (Categories Behavior)

Everyday purchases like **Grocery and Food & Beverage** are almost entirely paid via direct payment ("Accept"), with over **90%** of their transaction volume. High-value categories rely heavily on credit. For example, in **Jewelry & Watches**, financed transactions (Bank Installments + Consumer Finance = 9,219) actually exceed direct payments (7,309).
